

WNMHGB TOS-ERA TRANSPORTER ROOM – PAGE 3

Assembly Instructions (CONTINUED)

Cut out the walls and carefully score them. Glue the walls together, starting with the backdrop of the transporter platform. Then glue together the door wall piece [A], glueing the transporter backdrop [B] into the end with the pipes, and the short wall [C] opposite the transporter platform into the other end. Continue with the empty wall piece [D]. This connects to the transporter backdrop on one end. If you want to build the room so it can be taken apart for foldflat storage, leave a small stripe of the wall interior at the other end glueless. You will then be able to insert the wall flap and fix everything with a hair pin. If you want to keep the room assembled, just glue the wall flap into the wall. Make sure, the floor flaps face inside the room and bend the backdrop of the transporter platform round.

The instructions continue on page 5 with the assembly of the transporter console.

Wall D
