

Tiger Shark

Part 2: Right Side

Part 3: Left Side

Blue Shark

Part 2: Right Side

Part 3: Left Side

Blue Shark

Part 2: Right Side

Part 3: Left Side

Instructions:

1. Carefully cut out Part 1 (a hobby knife may be helpful). Score on the red line. Fold on the line and glue, making sure body halves align as closely as possible.
2. Cut out parts 2 and 3, the sides of the shark, very carefully. On the Blue Shark, pay special attention to where there is no black border. This is where the sides will line up with the dorsal fin on the center body of your shark.
3. Glue Part 2 to the right side of Part 1, carefully aligning from head to tail and with every fin. Smooth it out and hold it tightly for a couple of minutes. Let it set for at least ten minutes before continuing.
4. Glue Part 3 to the left side of Part 1, carefully aligning from head to tail and with every fin. Smooth it out and hold it tightly for a couple of minutes. Let the miniature dry overnight before continuing.
5. Using a dark marker, darken the edges of your miniature all the way around.
6. Mount the miniature in a pill or rectangular base. Personally, I recommend one with a sand or water texture.
7. Gently spread the pectoral fins of the shark until they look right to you. I recommend holding the model by the other hand by pinching above the pectoral fins tightly while you spread them.
