

Here is the mighty Sharktopus of Sy-Fy channel fame. I make no claim of ownership and I am not producing this in any expectation of profit. This is a fan's way of showing his appreciation and enthusiasm for a great B-movie franchise he hopes will continue in the future. This creature actually appears in my 1st edition AD&D game as a creation of advanced alchemy combined with dark sorcery much like the owlbear. I apologize for the poor quality of the tentacles, but I never claimed to be a great artist. They should be attached to the body in the pink circles with the suckers facing inward and posed as you wish. I recommend edging them with something other than a black pen except at the tips where the creature has horn-like spikes. I did not include spikes for the gill plates because they seemed like they would be too small to be of practical use. I hope you will enjoy this beast. The body length should be about 2" and the tentacles about 3". The official length given for the creature by the Sy-Fy channel is 25 feet, so this beast is a bit bigger. Enjoy.
