

Verminking - 2020

## Tent-type Velociraptor

Based on the Kamikami style, no longer available on the internet  
Mirror print on back to avoid blinding whiteness on the undersides.

Fold the three dino parts for each dino down the middle.  
Just a dab of glue at the tip of the tail and nose  
Glue foot tabs to the bottom of the base through the base slits.  
You probably want to glue cereal box card to the base for strength
