

1957 Chevrolet Bel Air

An almost completely modified version of the Bilspport Jr model by Grzegorz Rutka, scaled for 30 mm gaming

Fold in the taillights to be at a 90 degree angle to the sides and glue the angled top to the sides.

Glue the front bumper in place, positioning the headlights in their housings.

Glue the hood and windshield trim down.

Glue on the chassis. If your build is square, it should drop right in place. If it doesn't, use the chassis to square the vehicle up, so that the wheels all touch the ground.
